GUIDEBOOK**

Organic Ukraine Business Hub is a Ukrainian National Pavilion at the international organic fair. It is a format of cooperation among different companies acting in the same direction, combining organic business energy for common benefits, strengthening capitalization of the organic sector in general and each exhibitor of the National Pavilion in particular. Our National Pavilion is a part of the image strategy and a tool for the Ukrainian organic sector image management. The Ukrainian pavilion exhibitors are the renowned companies, Ukrainian organic market leaders, which respect and strengthen each other's reputation. Business always has a face. For us, this face is a face of a business owner for whom organic business is a philosophy and lifework.

The Ukrainian National Pavilion at Biofach is a place where the country's business reputation, and the organic sector's reputation in particular, is formed.

The Ukrainian organic sector's business image at Biofach-2020 is formed by Ukrainian businessmen, producers and exporters who are especially interested in strong positioning of Ukraine in the world. It is business owners, as parties in real contracts, who are forming foreign business' attitude to our country.

Organic Ukraine Business Hub is a business platform both for the companies which will present Ukraine as a reliable partner at Biofach for the 7th consecutive year and for new innovative companies which will participate for the first time and have ambitious export plans and possibilities. In 2020, at the National Pavilion you will find the companies which offer organic finished products, raw materials, fertilizers as well as consulting companies and NGOs.

The main task of the Pavilion is to increase the world's interest to and strengthen confidence in the Ukrainian organic sector. The concept of promoting organic Ukraine abroad through the National Pavilion is based on the image focused on development, openness, innovations and strength, agri-tech, abundant Ukrainian black soil and authenticity.

Organic Ukraine Business Hub prioritizes business, but forms the Ukrainian image together with the state. Cooperation of business and state is the key to success. That is why the Pavilion and organic export are supported by the Ministry for Development of Economy, Trade and Agriculture of Ukraine.

At the Pavilion international partners will unlock organic Ukraine – its possibilities, potential, strength, authenticity, partnership, and innovations.

Together we will expand the organic product segment in the world.

# Agro Organic AE, LLC

AGRO ORGANIC – CLEAN PRODUCT –  
HEALTHY FAMILY

**Control body: Organic Standard Ltd, Ukraine**

The company “Agro organic” was established in 2016. The main activities of our company are: growing and processing of organic products and exporting them to the EU. In 2017 we got our first certificate “Organic Standard”. Certificate “BioSwiss” which we got in 2018-2019 is the result of our hard work, so as the certificate “Natureland”. Today our company grows raspberries, strawberries, wild strawberries and buckthorn. The berries are collected during the ripening period and this guarantees the highest level of useful elements in them and they taste the best. This harvest is good for processing and long-term storage. Our products are used for dairy and confectionery industries, for producers of juice and jam.

We are considering ourselves not only from the economic point of view, our industry first of all cares about ecology and environment, about the health of our consumers and nation in general, provides new vacancies because organic production requires more labor than traditional production.

Recent researches show that the condition of our environment and people's health has worsened and this is a concern in a society. That's why the idea of creating “Agro organic” is to find the solution for these problems. This is how we created the production and presented eco-products to our consumers. The goal of the company is to show that our products are safe, positively affect human's body, they contain no hazardous ingredients and they do not pollute the environment.

Consumer value of berries grown on our fields create such factors: the best taste qualities, the bigger amount of nutrients, vitamins and minerals, absence of genetically

modified ingredients, preserving the environment during the production process and utilization of waste. In future we plan to broaden our areas, develop partnership with organic farms and potential consumers of our products and we plan to grow other kinds of berries.

# AGROECOLOGY, PE

HEALTHY SOIL, HEALTHY PRODUCT, HEALTHY PEOPLE

**Control body: Organic Standard Ltd, Ukraine**

## Company history

Private Enterprise “Agroecology” is the oldest Ukrainian company implementing only organic technologies in its work. Back in 1975 we focused on cooperation with nature in our manufacturing process by starting the introduction of subsurface tillage. In 1978 we refused using herbicides and other agrochemicals, and in a few years we stopped using mineral fertilizers as well. During 40 years the company has been creating its own model of organic farming which is based on soil surface cultivation and wide application of various organic fertilizers. The management system is aimed both at manufacturing organic products and preserving and increasing soil fertility, protecting the environment, implementing the principle of sustainable development. Our innovative approaches to farming are recognized by scientific and agrarian communities in Ukraine and in other countries; they are protected by numerous patents. The company is headed by Semen Antonets – the patriarch of organic farming in Ukraine. In 2010 the film «Solutions locales pour un désordre global» created by the famous French film director Coline Serreau represented our management methods as a standard for solving agriculture problems all over the world.

## Scientific and research activities

We are also open for cooperation in the area of sharing the organic farming practices. Every year hundreds of people visit our company in order to acquaint themselves with our system of production and study organic farming. We collaborate with leading scientific institutions and scientists who carry out research in this area. We have built the Organic Farming Centre with all the necessary conditions for holding conferences,

undergoing in-depth training and practical training. It has several conference halls, a hotel, a dormitory, a restaurant. We are ready to share our knowledge with anyone who is willing to be engaged in organic production and environment protection.

### Company's activities

The company carries out its production activities in an area of over 6700 ha located in Shishatsky and Zenkovsky districts of the Poltava region (Central Ukraine). Crop products processing is performed using our own manufacturing facilities.

The main field of the company's activities is dairy and beef cattle breeding. We have 6.7 thousand head of milk and dairy cattle.

Crop production and processing at Private Enterprise "Agroecology" are certified by the certification authority "Organic Standard" in accordance with the requirements of the Standard for organic production and processing which is equivalent to the EU Resolutions № 834/2007 and № 889/2008(UA-BIO-108 certificate). Besides that, we have NOP certificate.

We sell our products all over Ukraine and we have lot of experience in export to other countries. Our company is interested in finding new business partners for the expansion of organic products export and mutually beneficial cooperation. We can grow various grain, leguminous, oil-yielding crops and medicinal herbs to order.

# AGROFIRMA "POLE", LTD

EXPERT IN PROCESSING AND EXPORT  
OF ORGANIC CROPS

**Control body: Organic Standard Ltd, Ukraine**

Agrofirma "Pole" LTD was founded in 2007.  
It is based in Cherkasy, in the centre of Ukraine.

We follow the course of development of organic food industry, offering consumers a range of organic products of premium quality.

Since 2009, the company is certified by Organic Standard according to the Equivalent European Union Organic Production and Processing Standard.

The company is a specialist in production of hulled millet – it is offered in different variations and for different purposes (packing, puffing, milling, flaking, etc). Company became a reliable long-term supplier of many customers.

The high purity of grains is achieved by modern grain cleaning facility of Agrofirma Pole.

Quality control of products is carried out by own attested laboratory and by respected European laboratories. In 2016, the company was certified according to FSSC 22000.

Agrofirma "Pole" cooperates with Ukrainian agricultural enterprises involving a total organic area of 9'000 hectares, located mainly in the South of Ukraine.

Agrofirma "Pole" has own granary silos for its organic raw material, organic millet, with a total storage capacity of 5'000 tons, enabling the company to process and supply hulled millet all year round.

In 2015 and 2016 two subsidiary companies were founded in Czech Republic and in Poland to facilitate export to EU and make process of purchase more convenient for customers.

# Agrotrade Export, LLC

RELIABLE PARTNERSHIP  
WITH THE BELIEF IN FUTURE

Control body: Organic Standard Ltd, Ukraine

The formation and development of organic farming in AGROTRADE EXPORT LLC have passed a several stages.

The idea of organic farming in the company appeared in 2013 and management took the decision to create the farm in Kharkiv region. With this aim there were separated special lands and machinery, dedicated special division, which is engaged in planning, managing of a growing process, organizing of analyses and certification.

In 2017, Agrotrade Export LLC gathered the first harvest of organic products – soybeans, flax and lentils. In the same year Agrotrade Export LLC firstly exported the organic products flax and lentils to Germany.

In 2018, more than 2.500 hectares were given for organic farming in PAE "UKRAINE".

Hall 4A / 4A-511

In 2020 the company plan to grow organic winter wheat and barley, mustard, flax, corn, sunflower, peas and rapeseed.

Agrotrade Export LLC intends to extend the range of cultivated crops and is ready to discuss growing of organic products under the terms of pre-harvest contracts.

Today the company is in the top 15 producers of organic products in Ukraine.

Agrotrade Export LLC is focused on widening of the supply channels in foreign markets using their possibilities to ship the goods using different types of delivery.

Agrotrade Export LLC is oriented on the development of fruitful business relations to build long-term cooperation.

# All in Foody Group

WE ARE WHAT WE EAT

**Control body: Organic Standard Ltd, Ukraine**

All in Foody Group is a vertically integrated group of companies specializing in organic production since 2013. As of today, All in Foody is one of the largest organic producers and exporters in Ukraine. All in Foody is a closed cycle system that improves production efficiency, provides complete quality control and, as a result, maximizes profit. The company is certified according to the Equivalent European Union Organic Production & Processing Standard and Bio Suisse standards.

Today the company manages about 16 000 ha of land and exports 90% of its products to Germany, Switzerland, the Netherlands, Romania, Poland,

Ukraine

Austria etc. Production facilities are concentrated in the North-Western part of Ukraine (Zhytomyr and Rivne regions).

### What do we grow/produce?

1. Winter cereals (wheat, rye, spelt)  
Why? Because bread is a basic element in the structure of human nutrition. The use of organic raw materials will improve the quality of nutrition by offering high-quality "honest" products.
2. Oilseeds (high-oleic sunflower, flax, hemp) Why? Because vegetable oils are a basic element in the structure of human nutrition along with bread.

3. Pumpkin. Why? Because pumpkin has a wide and promising range of uses (from oil to pharmaceuticals).
4. Raspberries and walnuts.
5. Processed products: apple and berry juice concentrate, including blueberries, dried apple cake.

We plan to expand our activities and product range to producing own consumer goods, e.g. organic buns, cereals, vegetable oils and juices.

Our goal is to become the largest organic / eco cluster in Europe, and later in the world.

# Alta Kraina, LLC

JUST ANOTHER WAY TO COOPERATE

Control body: Organic Standard Ltd, Ukraine

**Alta Kraina is your personal guide in purchasing and supplying concentrated juices, fruit purées, berries and other ingredients.**

Alta Kraina Company is a producer and a professional agent in the international market for the food industry. We supply a wide range and variety of organic fruit purées, concentrated juices and frozen IQF berries.

We rapidly develop our own production of frozen berries and concentrated juices. It enables us to provide high-quality products which have our own personal guarantees.

**We have been working in the food industry for more than 15 years.**

During that period we have accumulated a unique suppliers base, learned how to make forecasts and prevent market risks, refined all possible problems associated with processes and stages of delivery, and started our own production.

However, our greatest advantage is communication. We provide each client with a personal manager who resolves all matters connected with the deal. We build up cooperation based upon maximum comfort and confidence for our customers and clients. Our priority is to know that you are smiling even when you're talking with us over the phone.

### Values that you receive:

- personal approach;
- handling all incoming requests;
- searching for new goods and suppliers;
- expert appraisal of the market and prices;
- quality control;
- price audit;
- prompt local deals;
- rapid delivery of goods.

### What we are doing:

- we are working as a purchasing department by searching for the most reliable suppliers of raw materials from Ukraine and around the globe for you;
- we are working as a sales department by supplying your food ingredients to the big industrial companies of the C.I.S. and Europe;
- we control the quality of supplied goods: ensure that all shipped products comply with the approved samples and specifications of the clients; audit the production and quality of the products; monitor the sanitary and hygienic standards;
- we take on all procedures connected with the shipping documents, contracts as well as the documents for the producer's distance audit.
- we monitor logistics, consult on the delivery cost and work out the most convenient goods delivery route.

# Amethyst-Ole, LLC

TOP GRADE INGREDIENTS FOR  
LEADING COMPANIES

**Control body: Organic Standard Ltd, Ukraine**

Since 2011, Amethyst Ole (formerly Berry Agro) has been committed to supplying high quality produce. It has taken years of research and development to establish best practices and sustain a successful supply program. We are committed to using the industry's best practices in every phase of production. As part of this commitment, we constantly strive for the highest domestic and international certification standards in the food industry.

Consumer demand and quality expectations for organic products continue to steadily increase, and we are proud to offer organic options and be one of the market leaders in terms of quality. Food safety and product quality are the two most important factors in growing, collecting and processing our fresh fruit and nuts. From the field and forest to harvesting and through production, Amethyst Ole strives to assure food safety standards and effective tracking of its organic products.

# Arnika Organic, LLC

WE GROW THE FUTURE,  
BECAUSE IT MATTERS

**Control body: Organic Standard Ltd,  
ECOGLOBE LLC, CERES GmbH**

Agroindustrial Group Arnika was established in year 2000 as an agricultural company with conventional farming. Already in twelve years the strategic decision was done by CEO, Founder and Owner, Andriy Pylypchenko, to carry out a large-scale business transformation and start an organic farming in the company.

Its organic way Arnika started with just 2K hectares of land in 2015. Currently, the company is running 15K hectares of organic certified land bank, that moved us to the rank of the largest organic companies in Ukraine, the biggest producer and exporter of certified organic goods. The commodity portfolio includes corn, winter wheat, soybean, chickpeas, sunflower (ho), hemp, etc. Arnika is certified in accordance with international, national and private organic standards, incl. EU, BioSuisse, NOP, COR, JAS.

Together with the tremendous transformation from conventional large-scale farm to a sustainable organic agribusiness, the company paid great efforts to digital solutions that aim to maintain traceability and full transparency of production and supply chains. Those tasks are fulfilled successfully by using GPS navigation and unmanned technologies.

Arnika Organic is a prominent player at the international organic market with a wide export geography, that includes Switzerland, Germany, Norway, Israel, Canada, USA, Japan, the UK, Italy, other countries. The well-developed logistic infrastructure gives us the opportunity to suggest

- More than 15 years of experience in ecological farming;
- 150 hectares of certified organic farm fields, including 80 hectares under drip irrigation;
- 50 full time employees, 100 seasonal workers;
- 1 000 000 Euro of annual gross income;
- Own trademark of organic products ("AHIMSA™");
- Own production of bio-fertilizers;
- Membership in many organic associations and cooperatives of Ukraine.

## Main products:

**Berries:** strawberry, raspberry, red currant, blackberry;

**Cereals:** winter rye, amaranth, millet, spelt;

**Vegetables:** asparagus, sweet potato.

Ahimsa means non-violence in Sanskrit. There is a picturesque eco-village in the forest on the banks of the river Orel that is free of pollution; it's in an ecological reserve of Ukraine, far away from industry and civilization with population embracing the values of love and nonviolence.

Everything they do is imbued with respect for humans, animals, and the environment. Cows cared for until natural death, organic fields and produce plenty of organic fertilizer. We cultivate Europe's best berries, vegetables and amaranth grain in humus-rich soil excluding the possibility of even accidental pollution. The southern Ukrainian sun nurtures our crops under the attentive care of the people, who are true believers in nonviolence, love, family, and friendship.

**Eurofins Agro Testing Ukraine offers the following types of analytical services:**

- Soil testing: pesticides, heavy metals, nematodes, physical and chemical parameters, microbiological parameters.
- Seeds testing: GMO, qualitative indicators.
- Green mass testing: pesticides, isotopes, micro- and macro elements.
- Testing of finished products and packaging: quality and safety (GMO, pesticides, dioxins, fat, fiber etc.), authenticity, label accordance. Declaration of conformity for the packaging materials.
- Testing of organic products, raw materials and products of processing: pesticides, GMO, heavy metals, mycotoxins, dioxins.
- Packaging testing: migration, metals, SVHS.

**We carry out testing in the following areas:**

- organic products;
- agriculture (soil, green mass, feed etc.);
- cereals, oilseeds, legumes;
- food products;
- water;
- packaging materials;
- environmental protection;
- pharmaceutical products;
- consumer goods.

# GALEKS-AGRO, PE

ORGANIC – THIS IS PHILOSOPHY

**Control body: Organic Standard Ltd, Ukraine**

The company's history started with the idea of creating a modern, exemplary enterprise that would meet European standards and at the same time preserve all the traditions of generations. Thus, in 2008, GALEKS-AGRO was founded.

The main activities of the enterprise were the production of organic products of plant and animal husbandry, and as a result – processing activities.

**Oleksandr Yushchenko**

**General director**

**Today, the area of certified organic land of the enterprise is 9616,4 ha.**

PE “GALEKS-AGRO” is the main of four complementary enterprises operating in the field of organic production. Each of them operates in a complete cycle: from growing fodder and keeping dairy herds to processing raw materials and producing high quality finished products. Enterprises are fully responsible for each stage.

Our main principle is to get the best of nature without harming it. That is why organic products are natural, environmentally friendly and beneficial.

Our idea is to introduce organic farming and animal husbandry in Ukraine to save the Earth for future generations.

# Galfrost, LLC

## COMPETENCE IN FRUIT

Control body: CERES GmbH

Galfrost is a Ukrainian company that built a modern cold store in 2007 and started its activity of fruit processing in Ukraine. We supply high-quality frozen and freeze-dried berries to big European companies of food industry during many years (in our portfolio are companies who belongs to Agrana/ Danone and Mondelez group, famost jam and confiture producers, etc.). Galfrost is certified by main standards: FSSC 22000 (analogue BRC), organic (EU organic, KRAV, NOP), KOSHER, Badatz; also products are HALAL suitable.

# Healthy Tradition, LTD

INNOVATE SNACKS & BAKERY  
FOR ACTIVE & HEALTHY LIFE

**Control body: Organic Standard Ltd, Ukraine**

Healthy Tradition is healthy food company that was established in 2015 by women with a strong philosophy oriented on healthy lifestyle and creative way of thinking. The business is owned and operated by women with the same values. Our values are: fairness, perfect quality, details matter, long term friendly relationships, impeccable reputation, inspiring positive changes in society, creative and artistic approach in everything we do.

Healthy Tradition TM produces branded certified organic gluten free vegan snacks. They are fruit and seeds bars, creative cookies, granola and protein crisps among them. The company uses gentle slow dry manufacturing technology. The ingredients are plant based: fruits, vegetables, berries, seeds, raw buckwheat and millet. No added sugar, syrups or sweeteners.

Healthy Tradition TM also produces gluten free bakery products such as vegan protein bread and muffins. All recipes and taste are unique and perfectly balanced, developed under dietary specialist control.

# Organic Standard, LTD

OUR CONTROL – YOUR CONFIDENCE

## Certification services

Organic Standard was founded in 2007 to become the first local inspection and certification body for organic production. Up to now, it is the only Ukrainian accredited organic certification body approved by the European Union and Switzerland.

Organic Standard provides its inspection and certification services to more than 500 organic operators within Ukraine. It represents more than 75% of all organic operators in the country. Moreover, it controls a meaningful and growing number of operators in Belarus, Moldova and Kazakhstan.

As most of our clients are focused on the international market, Organic Standard has become an important player in export certification services. Clients of the company annually export about 100 - 160 thousand tons of products (we control more than 2000 export consignments every year).

At the same time, Organic Standard helps national producers develop the local market. We provide different trainings regarding the requirements of organic standards. Annually, we organize The Field Day where experienced operators have the possibility to show the best practices in organic farming and exchange new knowledge in organic production. Our senior certification specialists are members of the expert group involved in the development and implementation of the national organic legislation.

# ProOrganica

**PROACTIVE, PROGRESSIVE, PROFESSIONAL**

**Control body: Organic Standard Ltd, Ukraine**

Formed in 2018, ProOrganica is the latest addition to CHEMEX's LTD growing portfolio of business ventures focused on the sourcing, handling, and supplying of organic produce in Ukraine.

## OUR MOVE TOWARDS ORGANIC

With its unique growing conditions, vast swathes of uncultivated land, and close proximity to some of the largest organic markets in the world, the potential of Ukraine's organic market is unprecedented.

With our proven expertise for over thirty years in material sourcing, handling, and logistics the organics market was a natural next step for CHEMEX LTD. So in the last few years we've started shifting part of our business operations and resources towards this promising market.

We are the first independent, organic certified service facility in Ukraine for cleaning, sorting, packing and storage of organic grains and pulses.

To implement this, in 2019 we acquired processing facilities and a plot of land next to Kyiv where we will run pilot projects in our processing factory for organic materials. We aim to present our first processed products to the market in 2020.

## OUR SERVICES

We primarily focus on business-to-business partnerships and have proven expertise in sourcing, purchasing, and handling as well as processing and supply capabilities.

### SOURCING

All the farms we work with are certified organic and all the raw materials that we process go through strict hygiene/sanitary checks performed by independent accredited laboratories.

### PURCHASING

We always purchase produce directly from Ukrainian organic farmers at a fair price, supporting small and family companies across the region.

### HANDLING

Through our state-of-the-art processing facilities we provide cleaning, sorting and packaging of products to meet the exact requirements of our customers.

## QUALITY CONTROL

We provide full traceability and transparency throughout our entire supply-chain and take charge of conducting quality checks and product analysis which go above and beyond the regulatory standards. This allows our manufacturers and retailers to validate claims about products and practices and communicate these to customers.

### EXPORTING

We can arrange for reliable and cost-effective international transport of products by rail, vessel, barge, container and truck. Sea containers are shipped via Odessa, Ochakiv or Bilhorod-Dnistrovskyi sea ports. We ensure that all shipping and logistics are conducted by certified organic freight forwarders to maintain the organic integrity of our supply chain.

# Rivneholod, ALC

QUALITY OF THE PRODUCT  
DEFINES PEOPLES' HEALTH!

**Control body: Ceres GmbH**

Rivneholod ALC was founded in 1950, since 2001 the company became a family-owned business.

A healthy eating is the sphere that develops rapidly and intensively especially in a modern world that constantly demands modernization. Thus, there is a growing demand for organic food including IQF berries.

Our territory is the main point of wild berries collection in Ukraine.

Geographically Rivneholod is conveniently located next to the wild berries main collection centers. These are the Carpathians and Polissya region that are the most ecologically clean areas in Ukraine. Blueberry, blackberry, lingonberry, cranberry, aronia and raspberry are rather widespread on these territories.

Rivneholod ALC is one the biggest Ukrainian manufactures of IQF wild berries.

We are in the process of constant modernization; in the 2006 we got HACCP certificate and launched organic production.

We are also certified according to international quality standards ISO 9001.

We do supply finished product during all year round, strictly following all the necessary temperature conditions in order to provide best quality of our product.

Now Rivneholod supplies finished product in all European countries, USA and China.

The main goal of the Company is to create the product that will meet the most up-to-date quality and safety standards, so that every Client could feel and enjoy amazing all-natural berry taste regardless the season. The process of berry collection consists of successive steps that are indispensable for both client, as well as manufacturer. The core policy thus is to preserve useful properties of the product.

# Skvira, GmbH

TIME-HONOURED QUALITY

**Control body: Organic Standard Ltd, Ukraine**

"Skvyrskiy grain processing factory" Ltd. was established in 1986-1991 on the basis of the grain reception centre operating since 1931. Having passed a long path from a grain storage facility to a large-scale factory, today it is a modern, powerful and versatile enterprise, one of the leaders of cereal-industry in Ukraine and one of the biggest plants in Eastern Europe.

Nowadays, the factory processes more than 5000 tons of grain per month and more than 50% of the production volume is exported to the near and far abroad countries. The company constantly masters new production technologies, expands products range, enters new markets around the globe.

The factory is certified according to FSSC 22000, Halal, Organic Standard UA-BIO-108 (deemed equivalent to the EU Regulations No 889/2008 and 834/2007), COR (Canada Organic Regime), Bio Suisse (Swiss standard for organic products).

The products range is represented by different types and grades of groats, flakes and flours, produced from buckwheat, oats, corn, wheat, rye, barley and millet.

Packing options include bulk, retail and private-label packaging. The products are represented in conventional, gluten-free, Organic and baby-foods quality. It is worth mentioning, that nowadays "Skvyrskyi grain processing factory" Ltd is a regular supplier of raw materials (flour) for production of baby foods mixes (milk/milk-free mixtures, creams, etc.) for such worldwide brands as "Danone", "Nestle",

"Nutriceal", "Hero", as well as to a number of other European ("Atlantic Grupa", "Vivera", "Bellakt" and others) and Ukrainian baby foods manufacturers.

Being guided by the customer respect principle, we guarantee high quality and safety of our products in accordance with legal requirements, regulatory documentation and customer requirements. Due to elaborate development strategy and implementation of advanced global standards, the enterprise has consolidated its status as a Ukrainian leader in production and sale of healthy food. The success of our brand is the result of combining modern technologies, expertise, professionalism and years of manufacturing experience.

without adding sugar, so we retain the unique taste and aroma of a product that can be used by itself or for preparing other high-quality products.

Organic berries (raspberry, strawberry, blackberry, etc.): Grown berries on the Ukrainian virgin soil have a special rich taste and contain many healthy elements and a number of vitamins. This is the main difference from grown berries in unchecked soils. Plants fertilized and protected from diseases and destructive insects only by biological products. That's why we get organic, ecological pure berries.

Wild berries – created by nature (blueberry, blackberry, elderberry, cranberry, lingonberry):

Wild berries are genetically diverse, consisting of hundreds

of different naturally occurring varietal clones. This mix gives wild berries their unique, complex flavors. This intense, sweet-tart taste is extraordinary and can't be duplicated through cultivation.

Wild Mushrooms – from the forest (chanterelle, porcini):

Our frozen mushrooms are processed as BQF and received from trusted supply partners by our experts in ecologically clean regions of Ukraine. Treated with our care for optimum taste & freshness.

# UkrBioLand, ASC

## Control body: Control Union Certifications

**UkrBioLand, ASC** – the family-owned and operated organic agricultural servicing cooperative with the **land bank over 5 500 ha** located in the Dnipropetrovsk region, the center of Ukraine.

UkrBioLand farms started its activities in 2003. Since 2013, for the last years, it has been working on the development of Ukrainian organic production and asserting values of careful and responsible agri-producer.

**100% of our lands are certified**, to minimize the risk of contamination with non-organic products.

**UkrBioLand is in TOP 5 organic producers in Ukraine by the farm size.**

On the best soils in the world UkrBioLand is growing the high-quality organic products:

- **Cereals:** Soft Wheat, Millet, Rye, Triticale, Naked Barley, Amaranth.

Nominal volume of production is 18000 t per year of processing of sunflower seeds.

UKROLIYA ORGANIC is the first plant in Ukraine specializing in the processing of exclusively organic raw materials. UKROLIYA ORGANIC is certified according to the organic products standard of the European Union, the Swiss standard – Bio Suisse and USA standard – NOP.

GARNA organica are healthy, delicious, safe, vegetable oils, produced of high quality premium organic seed.

The brand offers a unique product with health benefits by retaining their vitamin E content, which is a natural antioxidant, and having a balance of Omega-6 and Omega-9 essential fatty acids.

GARNA organica oil is poured into dark-glassed bottles, which prevents sunlight, helps to preserve the nutrients of natural oil.

Organic is in the heart of everything we do. We are committed to idea of improving the consumer's life quality.

# Vanik Organic, LLC

**Control body: Organic Standard Ltd, Ukraine**

Why Vanik Organic? We can see the way a modern human tends to treat food (even though it looks to be getting better already, at least in Europe). Nowadays it looks like consumption of a new kind of a “drug”, which is fast food. There is nothing bad about it unless it comes to be made of conventional raw products, containing dangerous pesticides, that lay into one's body creating its own conglomerate of cells and producing predictable sequences.

Our mission is not to decrease human's abilities and our DNA. Instead, we are aimed at an increase or at least to maintain it stable. Thus we found the company in the year 2015 as so to meet the demand of the world's market, supply the mentioned with excellence of organic Ukrainian agricultural goods the demand of a healthy (or unhealthy, but willing to be one) human to be looking forward in the bright future of humanity and keep running the relatively new organic industry.

Since starting and supplying our first contracts we have always aimed at providing our consumers with both
