Sustainable Livestock and
Animal Welfare – Ukraine 2025

SUMMARY

The Sustainable Livestock and Animal Welfare Forum – Ukraine 2025 will explore how Ukraine's livestock sector is navigating transformation under multiple challenges, including the ongoing war and the EU accession process. The event aims to raise awareness of the urgent need to finalize the alignment of the national legislation with EU animal welfare standards and to ensure effective implementation of rules for the keeping, transport, and killing of farmed animals. A functioning official control system is essential not only for Ukraine's European integration but also for the development of international trade and the promotion of responsible, ethical livestock production.

While Ukraine is widely known for its crop production, the livestock sector also plays an important role in both national and global food security. According to the State Statistics Service of Ukraine, as of January 1, 2025, the country had 2 million head of cattle, 4.5 million pigs, 843,000 sheep and goats, and over 187 million poultry. These animals are kept on more than 77,000 farms and in 13.9 million households, engaging approximately 16 million people in agricultural production. Over 80,000 students are enrolled in agricultural universities and colleges, forming the foundation of the sector's future capacity.

Producers implement crisis-adapted management and better welfare practices. The government is working to harmonize policies with EU standards, and universities are updating curricula to reflect new demands. But are these efforts enough to reach the objectives? What strategies are needed to ensure lasting progress? How can all stakeholders work together more effectively to accelerate this transformation?

Representatives from the Ministry of Economy Environment and Agriculture of Ukraine, the State Service of Ukraine on Food Safety and Consumer Protection, producer associations, businesses, academia, international technical assistance projects, and consumer organizations will come together to discuss these pressing questions.

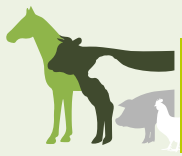

The Forum will showcase practical examples, share lessons learned, and highlight the importance of coordinated action between policymakers, producers and scientists to build a sustainable livestock sector – even in times of crisis.

FORUM SCHEDULE

October 2, 2025
09:00 – 17:00 CET

EET	CET		
10:00–10:30	09:00–09:30	Welcome and opening. Towards Sustainable Livestock Farming

Animal Welfare – Ukraine 2025

SESSION I.

ANIMAL WELFARE POLICY: ALIGNING WITH THE EU

🕒 09:30 – 10:30

Stanislav Ralchev

Policy Officer
Unit Animal Welfare of
European Commission,
DG SANTE

EU expectations regarding animal
welfare of farmed animals

Ramunas Zhalys

Senior Specialist of
Animal Welfare Division of
Food and Veterinary Policy Department,
State Food and Veterinary Service of
Lithuania

Lithuania: experience and challenges
during implementation of animal
welfare rules

Vitalii Kryuchkov

Head of the Animal Health and Welfare
Division, Sanitary and Phytosanitary
Measures Directorate, Department of
State Policy on Sanitary and Phytosanitary
Measures and Food Safety, Ministry of
Economy

Status of harmonization of the national
legislation regarding welfare of farmed
animals to EU requirements

Oleksii Klymenok

Head of the Animal Health and Welfare
Unit of the Directorate of Animal Health
and Welfare, Organization of Anti-Epizootic
Measures of the Department of Food Safety
and Veterinary Medicine, SSUFSCP

Current status of the implementation
of the official control system on farmed
animals' welfare in Ukraine

🕒 10:30 – 11:00

Moderated discussion with audience

Session's
moderator:

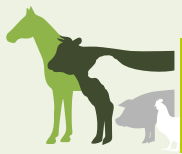

Julia Hüttl

International expert of the Dairy Sector Component, QFTP

🕒 11:00 – 11:30

Break
